## PERSONAL PROFILE

---

- I'm a double bachelor student in both Software and Web science, starting a Master of Data Science and Entrepreneurship in February 2019. I have developed skills in programming and the development of software solutions through my degree.
- Next to my study I use my own company Funk-IT to learn the fundamentals of entrepreneurship by using data analysis to create business opportunities.
- I also actively work as a backend developer at TravPRO Mobile, where I gain field experience in developing and maintaining tools that are used by over 10,000 monthly users.

## EDUCATION

---

	<b>SOFTWARE SCIENCE</b> <i>Technische Universiteit Eindhoven</i> Elective packages: <ul style="list-style-type: none"><li>- New product marketing and development</li><li>- Process analytics and systems</li><li>- Preparation master Data Science</li><li>- Bachelor End Project: creating a cooperative ITS solution together with MACQ, Dynniq and A-team</li></ul>	2015 - Present

## WORK EXPERIENCE

---

### FUNK-IT, *Owner*

2018 - Present

With Funk-IT I'm helping companies find business-opportunities through the analysis of their data. I've also created personalized websites for various companies.

### TRAVPRO MOBILE, *Backend developer*

2017 - Present

TravPRO mobile creates training tools for employees of travel agencies. As a backend developer my task is to create and maintain a tool through which the travel agencies could maintain their own training programs.
